Response Attachment 200-104

This RID requests that the SLS be modified to contain a level of design information that is below the level of detail believed by the SLS authors to be appropriate for a System Level Specification. In this case the RID requests a functional block diagram that depicts the scenario in the requirement. This level of detail is captured in the System Design Document 84K00210-000 currently in the pre-release phase. The RID Management Team agrees with this position. The RID is therefore Rejected. Thank you for reviewing the SLS and submitting your RID. Even though we rejected this RID, your input is valuable and we appreciate it.
